

Deck Drain Evacuator

Key Features:

- Very effective source-capture exhaust
- Typical application: new facility design
- More design flexibility than other Evacuators
- Integral manufacturing with Paddock Pool Equipment Company's stainless steel deck drain
- Perfectly compatible with standard PPEC deck drain
- Requires no deck space, avoid ADA compliance issues
- Compatible with most DHU manufacturers
- Durable HDPE grating, built to last
- Easy to remove, clean, and maintain grating
- Contributes towards LEED certification
- Designed for ASHRAE compliance
- Paddock Keys to Success Handbook
- YMCA Preferred Vendor since 2015

Optional Features:

- Custom grating colors available
- Custom grating engraved logos available
- Energy recovery add-on
- Natabot Control Panel

- **NAQ: Natatorium Air Quality:** We analyze existing conditions to provide an action plan tailored to your concerns, because we know that no two pools are the same.
- **Reduce Pool Smell:** Evacuator technology effectively addresses chloramine odor by preventing buildup and recirculation of airborne disinfectant byproducts (DBPs).
- **Reduce Illness:** Getting rid of DBPs, known contributors to respiratory distress, will improve NAQ for everyone!
- **Reduce Maintenance:** Chloramines are corrosive. With Evacuator, you can reduce their impact on your dehumidification unit and deck equipment.
- **Green Technology:** Our systems allow for both energy recovery add-ons and energy saving *Adaptive Environment* operation mode with our new Natabot Control Panel.
- **Proven Equipment:** Paddock Evacuator technology has received seven patents, with several more pending. There are nearly 200 FreshAir Facilities nationwide. We are happy to coordinate tours, because we are confident that you will *Breathe & Believe!*
