Chloramine Evacuation System

BREATHE & BELIEVE

WE'RE ON A MISSION TO SAVE YOUR POOL

Our custom-fit, patent-pending system captures toxic and corrosive gasses at their source and draws them out of your facility, extending the life of your pool equipment and facility.

FRESH AIR FOR ALL

Our chloramine evacuation system ensures fresh, clean air throughout your natatorium, so your swimmers, patrons and staff are at their healthiest and competitive best, symptom-free of "pool flu."

A HEALTHY SAVINGS

Turn chronic challenges into perpetual savings! Paddock Evacuator™ can help you save on energy, maintenance and capital expenditure costs while protecting you and your patrons. Excellent ROI.

TRI-CHLORAMINES ARE HARMFUL

Swimming in chlorinated pools produces toxic gasses such as tri-chloramines. According to a Purdue University study, exposure has been “linked to reduced lung function in adult swimmers, and itchy eyes, runny nose, and voice loss in lifeguards.” Read more at: www.paddockevacuator.com

AND IT'S ALL OVER THE NEWS
